Anti-slip Rating

As an indication of the products excellent slip resistance and wearing properties, the slip resistance rating of Floor Tuff Green has been independently tested according to AS/NZ4586:2004 Appendix A (Wet Pendulum Test) and achieved a BPN of up to 58 Class V. Note: The manner in which the product is applied will effect its anti-slip rating and may produce a lower result. An accelerated wear test of 4000 cycles equating to approximately 8 years of average wear the product's slip rating was reduced to a BPN of 45 Class W.

****Limitations**

Areas of a build up of fatty or greasy substances and grime will diminish or negate the product's effectiveness and it is not recommended that it be used in these areas. To maintain the anti-slip properties, it is essential that the product be keep free and clean of dirt build-up and chemicals spills must be immediately cleaned. May not be suitable in areas subject to corrosive chemicals.
