

Anti Slip Strips and Non Skid Treatment Solution

WHAT IS SAFE GRIP?

SAFE GRIP has been designed to provide slip resistant edges and strips as well as attractive and protective coating for foot and vehicular traffic and for some very special situations.

Some of the advantages of using Safe Grip

- Trowel and edger applied
- Quick curing – 4 to 5 hours trafficable, fully cured in 12 hours
- Very tough and hard wearing
- Very high – independently tested - slip resistance rating
- Electric current resistant
- Odourless - no solvents
- Surface is non slip even with oil on it
- Suitable to light to heavy traffic
- Easily over-coated and repaired
- Chemical resistant
- Attractive, customer can choose almost any colours
- Easy to clean
